the G.O. of 22nd Nov 1923 was placed at the disposal of the R.C. for certain specific works to be carried out mainly by the Revenue Dept & partly by the P.W.D. It therefore seems that the sum of Rs 5000/- cannot be met out of that amount. In para 2 of the D.O. of 5th January 1924 it has been stated that the extra will be met out of the grant for Distress Relief operations in the State — a grant that will hereafter be earmarked for that purpose:

To the Comptroller, will, if approved, be informed accordingly.

Answer

18/1/24

18.1.24.

Rev. Secy) It appears best to meet the Amount out of the sum of one lakh of rupees sanctioned in G.O. of 22nd Nov 1923. The R.C. may be informed that he should make the amount available for the Agriculture Department - It may not be possible to find the amount out of the grants given to the agriculture

Ag. Secretary to the Govt. of Mysore,

Rev. Deptt., Bangalore.

SIR,

With reference to Government Order No.122-4/D of 5th instant, I have the honour to state that the amount sanctioned is entirely inadequate. The sum provided would not enable us to inoculate all the cattle which are likely to move leaving alone the other animals in these tracts which are already infected. We simply dare not take chances in this matter and must have a reserve supply of serum on hand. It would, I submit, be practically a crime to move valuable cattle across the State and not at the same time place ourselves in a position to protect them from contagious disease. It would be better to leave them in their villages to starve. We should thereby at least be saved the expense of moving them.

I have the honour therefore to request that my original proposals in this regard be sanctioned.

I have the honourto be,

Sir,

Your most obedient servant,

Leslie C Coleman

Director of Agriculture.

Letter No. R.O.C..973-H.C. 302 of 23-24 dated January 3rd, 1924 from the Director of Agriculture to the Revenue Secretary to Governm.

I have the honor to draw attention to the fact that Government Order No. 49-63/D. of the 26th ultimo, contemplated the cutting of only 2,000 tons of hay by the Forest Department to meet the needs of cattle which may be moved from taluks where fodder scarcity is severe. I believed that this amount is totally inadequate to meet the needs of the situation. We have already estimated that at least 500 tons of this will be required for supplying the marching camps. That would leave only 1500 tons for use on the spot.

I anticipate a movement of between 5,000 and 10000 head of cattle. If we take the lower figure of 5,000, 1500 tons of hay would last only 30 days with feeding practically a famine ration.

I believe, it would be very unwise to anticipate that we should have to feed these animals only 30 days and except that we shall be able to move more than 5000 head of cattle.

I consider that hay should be cut and stacked up to the limit of our capacity. I have discussed this matter with both the Conservator of Forests and with the Live Stock Expert who has just inspected the areas, where cutting operations are going on. They are both of opinion that very much more than 2,000 tons could be cut and stacked.

An examination of the figures shown me by the conservator of Forests indicate that we can cut and stack 6,000 tons (of which 500 tons will be baled and sent out for marching camps) for one lakh of rupees. I believe that this sum should be set aside at once for this purpose. If this is not done the Conservator will, of course, have to engage labour sufficient for only 2,000 tons. That amount will be cut and we shall be able to get no more as the cutting operations must be over within a month.

If Government now sanction the larger sum, arrangmenets may still be made to organize labour and get a larger quantity of grass cut. We should then have a really useful reserve to fall back upon. In case we should not actually need to use up this reserve, I am certain it could be sold at a handsome profit to the Military Grass Farms who
